Sam Curry, CSO, Cybereason

Indicators of compromise are important. But what if you could also detect patterns of behavior that tip you off before a crime? This is where Cybereason's Sam Curry is trying to shift the focus.

**See Also:** Redefining Security Analytics

In a video interview with Information Security Media Group at RSA 2020, Curry discusses:

- How the indicators of behavior conversation has evolved;
- The maturing of mobile defenses;
- Multi-level concerns about election vulnerabilities.

Curry brings over 25 years of experience in security with a focus on deep technology and solving practitioner problems to his role as Cybereason's CSO. He was previously CTO and CSO at Arbor Networks, senior vice president of engineering and CISO at Microstrategy and held a number of significant senior roles at RSA.
